

Feedback M5

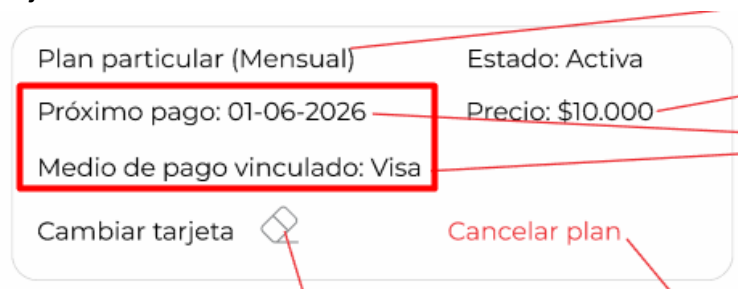

1. Subscription fields: Include all fields described in Figma.

What you currently have:

- You have included the "Cupos" field, and that one should not be included.
- You have to include 2 additional fields:
 - "proximo_cobro"
 - "tarjeta"

2. Notifications Module:

- Apply filters correctly:** The "Unread" button must filter by the field "is_read = false"
- Update read notification status:** You must make it so that when a subscription is read, its "is_read" status changes.
