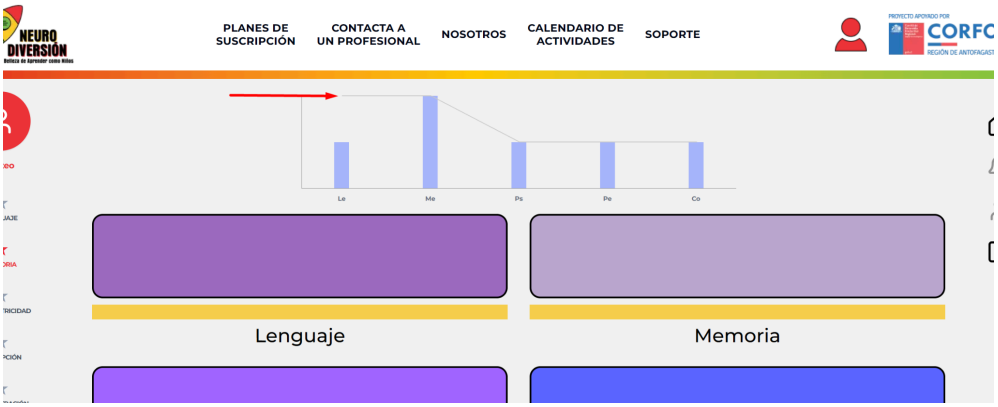
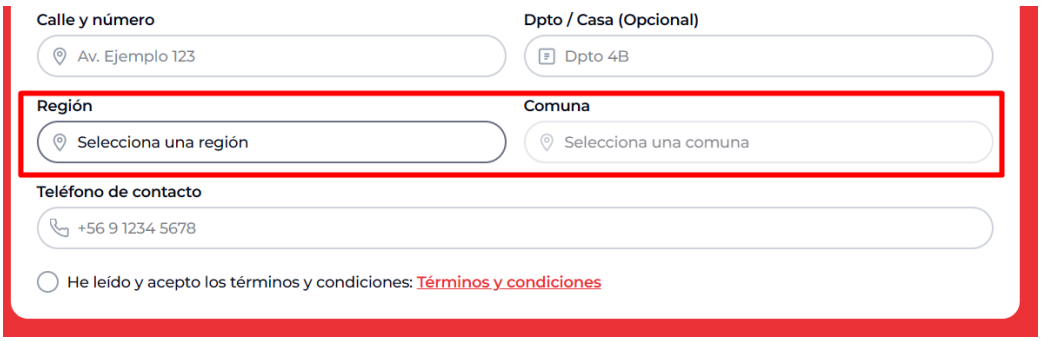
Feedback M4 - Part 2

1. When answering a question and pressing return to the student dashboard, the bar updates correctly, but the line connecting all the bars does not:

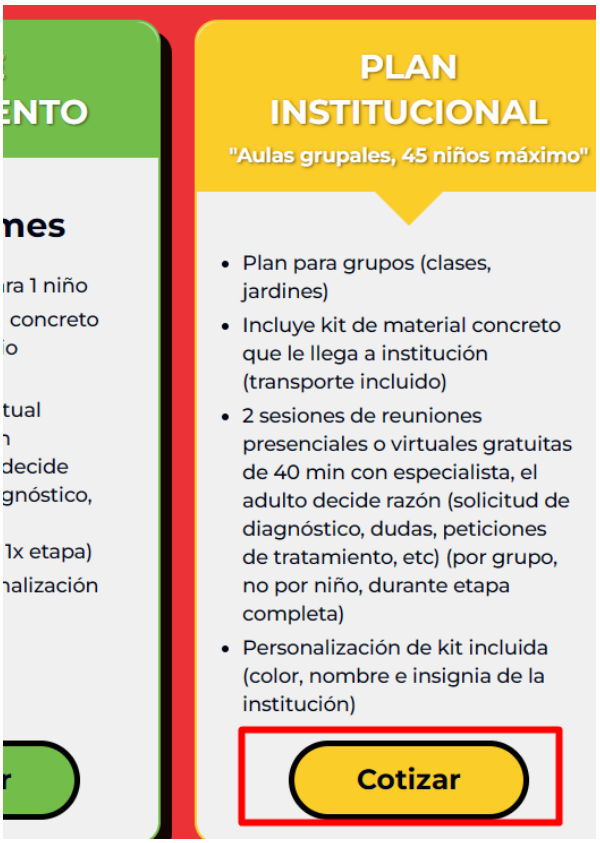


2. When switching between the subscription buttons, a strange movement occurs in the layout. I will share a video with you.

3. In the "Región" and "Comuna" fields, the JSON is correct, but the component is also required to allow typing and filtering the data to be entered:



4. The following button should also have a hover animation:



5. Strange movement when entering the course dashboard: When the next window opens, the entire layout moves. It is related to the loading of the side scroll bar.
